Dylan Wang

dylanywang06@gmail.com | (703) – 935 – 9101 | Ashburn, VA | github.com/DYitaoW | linkedin.com/in/dylanywang06/

Education

Purdue University | *West Lafayette, IN* **Expected May 2028**

***B.S. in Computer Science**, Minors in Management and Finance* **GPA: 3.73 / 4.00**

- **Relevant Courses**: *Systems Programming, Data Structures & Algorithms, Software Engineering I, Computer Architecture, Intro to Analysis of Algorithms, Problem Solving & O-O Programming, etc.*
- **Honors:** *Dean's List & Semesters Honors, 2024-2026*

Technical Projects

***Beyond the Stats* –** *Soccer Predictor* | *Python, Pandas, Scikit–learn, Swift, Flask*

GitHub: *https://github.com/DYitaoW/Soccer-Result-Predictor*

- Built a data pipeline to collect, clean, normalize, and aggregate over 10,000+ historical match result data from multiple APIs to combine into a single large-scale database
- Engineered a complex team performance predictive model, achieving a 63% match result accuracy across 550+ real-world matches with predictions generated pre-match, across multiple different leagues
- Developed and deployed SwiftUI iOS and web applications to present model-generated predictions through responsive, and intuitive interfaces, making the predictions publicly available to others
- Designed a backend API system and server to provide real-time data from the predictive pipeline to the users to form an end-to-end system, transforming raw data to visual predictions for users globally

***Boilermates* -** *Team Project* | *Java, Socket Networking, Client/Server Architecture*

GitHub: *https://github.com/DYitaoW/BoilermatesFinalCopy*

- Developed a user interface for a social networking application, focused on responsiveness and intuitive design layouts and user interaction features
- Engineered a server storage system using sockets, implementing user messaging, photo storage, persistent data storage, and friend/blocking functionality

Experience

Course Teaching Assistant (CS250) – *Purdue University* | *West Lafayette, IN* **Fall 2026**

- Assisted students with conceptual questions and assignments during lab sessions and office hours
- Collaborated with a team of staff and TAs to develop new course materials and improve instruction

Cybersecurity Team Member - *Purdue National Defense Society* | *West Lafayette, IN* **2025 - 2026**

- Researched and analyzed security vulnerabilities, identifying potential threats and designing mitigation strategies against identified security threats

Grassroots Soccer Referee – *U.S. Soccer* | *Ashburn, VA* **Since 2021**

- Trained and mentored new referees in match procedures, quick decision making, effective game management, and lead officiating teams through game logistics.

Technical Skills

- **Languages:** *Java, C/C++, Python, Swift, JavaScript*
- **Frameworks & Technologies:** *SQL, Git, Scikit-Learn, Pandas, Flask, React, HTML, CSS*
